SECTION 5: Firefighting Measures

5.1. Extinguishing Media

| Suitable Extinguishing Media | Water spray, fog, carbon dioxide (CO ₂), alcohol-resistant foam, or dry chemical. |
|---|---|
| Unsuitable Extinguishing Media | Application of water stream to hot product may cause frothing and increase fire intensity. Do not use a heavy water stream. A heavy water stream may spread burning liquid. |
| 5.2. Special Hazards Arising Fi | rom the Substance or Mixture |
| Fire Hazard | Flammable liquid and vapour. Vapours are heavier than air and may travel considerable distance to an ignition source and flash back to source of vapours. |
| Explosion Hazard | May form flammable or explosive vapour-air mixture. |
| Reactivity | Reacts violently with strong oxidisers. Increased risk of fire or explosion. |
| Hazardous Decomposition Products in Case of Fire | Carbon oxides (CO, CO ₂). Silicon oxides. Formaldehyde. |
| 5.3. Advice for Firefighters | |
| Precautionary Measures Fire | Under fire conditions, hazardous fumes will be present. Exercise caution when fighting any chemical fire. |

Safety Data Sheet

According to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2015/830

| Firefighting Instructions | Use water spray or fog for cooling exposed containers. In case |
|--------------------------------|--|
| | of major fire and large quantities: Evacuate area. Fight fire |
| | remotely due to the risk of explosion. |
| Protection During Firefighting | Do not enter fire area without proper protective equipment, |
| | including respiratory protection. |

SECTION 6: Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures 6.1.

| General Measures | Do not get in eyes, on skin, or on clothing. Do not breathe |
|-----------------------------|--|
| | vapor, mist or spray. Keep away from heat, hot surfaces, sparks, |
| | open flames, and other ignition sources. No smoking. Use |
| | special care to avoid static electric charges. |
| 611 For Non-Emergency Perso | nnel |

6.1.1. For Non-Emergency Personnel

Protective Equipment Use appropriate personal protective equipment (PPE). Evacuate unnecessary personnel. Stop leak if safe to do so. **Emergency Procedures** 6.1.2. For Emergency Responders **Protective Equipment**

Emergency Procedures

Equip cleanup crew with proper protection.

Upon arrival at the scene, a first responder is expected to recognize the presence of dangerous goods, protect oneself and the public, secure the area, and call for the assistance of trained personnel as soon as conditions permit. Ventilate area. Eliminate ignition sources.

Environmental Precautions 6.2.

Notify authorities if liquid enters sewers or public waters. Prevent entry to sewers and public waters.

Methods and Materials for Containment and Cleaning Up 6.3.

| | 3 · · |
|-------------------------|---|
| For Containment | Contain any spills with dikes or absorbents to prevent migration and entry into sewers or streams. As an immediate precautionary measure, isolate spill or leak area in all directions. |
| | |
| | Ventilate area. |
| Methods For Cleaning Up | Clean up spills immediately and dispose of waste safely. Absorb and/or contain spill with inert material. Do not take up in combustible material such as: saw dust or cellulosic material. Transfer spilled material to a suitable container for disposal. Use only non-sparking tools. Contact competent authorities after a spill. |

Reference to Other Sections 6.4.

See Section 8 for exposure controls and personal protection and Section 13 for disposal considerations.

SECTION 7: Handling And Storage

Precautions for Safe Handling 7.1.

Additional Hazards When Processed

Flammable vapors may accumulate in the head space of closed systems. Container may remain hazardous when empty. Handle empty containers with care because residual vapours are flammable.

Safety Data Sheet According to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2015/830

| Precautions for Safe Handling | Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes, on skin, or on clothing. Do not breathe vapours, mist, spray. Take precautionary measures against static discharge. Use only non-sparking tools. Use only outdoors or in a well-ventilated area. Handle empty containers with care because they may still present a hazard. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. |
|----------------------------------|---|
| Hygiene Measures | Handle in accordance with good industrial hygiene and safety procedures. |
| 7.2. Conditions for Safe Storage | ge, Including Any Incompatibilities |
| Technical Measures | Comply with applicable regulations. Take action to prevent static discharges. Ground and bond container and receiving equipment. Use explosion-proof electrical, ventilating, and lighting equipment. |
| Storage Conditions | Store in a dry, cool place. Keep/Store away from direct sunlight, extremely high or low temperatures and incompatible materials. Store locked up/in a secure area. Store in a well- ventilated place. Keep container tightly closed. Keep in fireproof place. |
| Incompatible Materials | Strong acids, strong bases, strong oxidizers. |

8.2. Exposure Controls

Appropriate Engineering Controls Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Ensure adequate ventilation, especially in confined areas. Ensure all national/local regulations are observed. Gas detectors should be used when flammable gases or vapors may be released. Proper grounding procedures to avoid static electricity should be followed. Use explosion-proof equipment. Gas detectors should be used when toxic gases may be released.
