First-Aid Measures General	Never give anything by mouth to an unconscious person. It you
	feel unwell, seek medical advice (show the label where

possible).

First-Aid Measures After When symptoms occur: go into open air and ventilate **Inhalation**

suspected area. Remove to fresh air and keep at rest in a

position comfortable for breathing. Get medical

advice/attention.

First-Aid Measures After Skin Immediately remove contaminated clothing. Immediately Contact

drench affected area with water for at least 15 minutes.

Immediately call a poison center or doctor/physician.

Ingestion POISON CENTER or doctor/physician.

4.2. Most Important Symptoms and Effects Both Acute and Delayed

May cause respiratory irritation. May cause damage to organs Symptoms/Effects

> through prolonged or repeated exposure. Causes skin irritation. Causes serious eye irritation. Harmful in contact with skin.

Harmful if inhaled. May be fatal if swallowed and enters

airways.

Symptoms/Effects After

Inhalation

Irritation of the respiratory tract and the other mucous

membranes. Inhalation is likely to cause adverse health effects including but not limited to: irritation, difficulty breathing, and

unconsciousness.

Symptoms/Effects After Skin	Redness, pain, swelling, itching, burning, dryness, and
Contact	dermatitis. This material is harmful through skin contact, and
	can cause adverse health effects or death in significant
	amounts. This material may be absorbed through the skin and
	eyes.

Symptoms/Effects After Eye

Contact

Contact causes severe irritation with redness and swelling of the

conjunctiva.

Symptoms/Effects After

Ingestion

Aspiration into the lungs can occur during ingestion or vomiting

and may cause lung injury.

Chronic Symptoms None expected under normal conditions of use. May cause damage to organs through prolonged or repeated exposure.

Indication of Any Immediate Medical Attention and Special Treatment Needed 4.3. If exposed or concerned, get medical advice and attention. If medical advice is needed, have product container or label at hand.

SECTION 5: Firefighting Measures

5.1. **Extinguishing Media**

Suitable Extinguishing Media Dry chemical powder, alcohol-resistant foam, carbon dioxide

(CO₂). Water may be ineffective but water should be used to

keep fire-exposed container cool.

Unsuitable Extinguishing Media Do not use a heavy water stream. A heavy water stream may

spread burning liquid.

5.2. Special Hazards Arising From the Substance or Mixture

Fire Hazard Flammable liquid and vapour.

Explosion Hazard May form flammable or explosive vapour-air mixture.

Reactivity Reacts violently with strong oxidisers. Increased risk of fire or

explosion.

Hazardous Decomposition

Products in Case of Fire

Carbon oxides (CO, CO₂). Hydrocarbons. Will decompose above 150 °C (> 300 °F) releasing formaldehyde vapours.

Formaldehyde is a potential carcinogen and can act as a skin and respiratory sensitizer. Formaldehyde can also cause

respiratory and eye irritation.

5.3. **Advice for Firefighters**

Precautionary Measures Fire Firefighting Instructions

Exercise caution when fighting any chemical fire.

Use water spray or fog for cooling exposed containers. In case

of major fire and large quantities: Evacuate area. Fight fire

remotely due to the risk of explosion.

Do not enter fire area without proper protective equipment, Protection During Firefighting

including respiratory protection.

SECTION 6: Accidental Release Measures

Personal Precautions, Protective Equipment and Emergency Procedures 6.1.

General Measures Do not get in eyes, on skin, or on clothing. Keep away from

> heat, hot surfaces, sparks, open flames, and other ignition sources. No smoking. Use special care to avoid static electric

charges. Do not breathe vapor, mist or spray.

6.1.1. For Non-Emergency Personnel

Protective Equipment Use appropriate personal protective equipment (PPE). **Emergency Procedures** Evacuate unnecessary personnel. Stop leak if safe to do so.

14/12/2020 4/16

Safety Data Sheet

According to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2015/830

6.1.2. For Emergency Responders

Protective Equipment Equip cleanup crew with proper protection.

Emergency Procedures Upon arrival at the scene, a first responder is expected to

recognize the presence of dangerous goods, protect oneself and the public, secure the area, and call for the assistance of trained personnel as soon as conditions permit. Ventilate area.

Eliminate ignition sources.

6.2. **Environmental Precautions**

Prevent entry to sewers and public waters.

Methods and Materials for Containment and Cleaning Up

For Containment Contain any spills with dikes or absorbents to prevent migration

and entry into sewers or streams. As an immediate

precautionary measure, isolate spill or leak area in all directions.

Ventilate area.

Methods For Cleaning Up Clean up spills immediately and dispose of waste safely. Absorb

> and/or contain spill with inert material. Do not take up in combustible material such as: saw dust or cellulosic material. Transfer spilled material to a suitable container for disposal. Use only non-sparking tools. Contact competent authorities after a

spill.

Reference to Other Sections 6.4.

See Section 8 for exposure controls and personal protection and Section 13 for disposal considerations.

SECTION 7: Handling And Storage

7.1. **Precautions for Safe Handling**

Additional Hazards When

Processed

Handle empty containers with care because residual vapours

are flammable.

Precautions for Safe Handling Do not get in eyes, on skin, or on clothing. Avoid breathing

> vapors, mist, spray. Take precautionary measures against static discharge. Use only non-sparking tools. Use only outdoors or in a

well-ventilated area. Handle empty containers with care

because they may still present a hazard. Wash hands and other exposed areas with mild soap and water before eating,

drinking or smoking and when leaving work.

Hygiene Measures Handle in accordance with good industrial hygiene and safety

procedures.

Conditions for Safe Storage, Including Any Incompatibilities

Comply with applicable regulations. Take action to prevent **Technical Measures**

> static discharges. Ground and bond container and receiving equipment. Use explosion-proof electrical, ventilating, and

lighting equipment.

Storage Conditions Store in a dry, cool place. Keep/Store away from direct sunlight,

> extremely high or low temperatures and incompatible materials. Store locked up/in a secure area. Store in a wellventilated place. Keep container tightly closed. Keep in

fireproof place.

Incompatible Materials Strong acids, strong bases, strong oxidizers.

Specific End Use(S)

For professional use only.

8.2. Exposure Controls

Appropriate Engineering Controls

Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Ensure adequate ventilation, especially in confined areas. Ensure all national/local regulations are observed. Gas detectors should be used when flammable gases or vapors may be released. Proper grounding procedures to avoid static electricity should be followed. Use explosion-proof equipment. Gas detectors should be used when toxic gases may be released.

Safety Data Sheet

According to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2015/830

Personal Protective Equipment Gloves. Protective clothing. Protective goggles. Insufficient

ventilation: wear respiratory protection.

Materials for Protective Clothina

Chemically resistant materials and fabrics. Wear fire/flame

4.2. Most Important Symptoms and Effects Both Acute and Delayed

Symptoms/Effects Harmful in contact with skin. Harmful if inhaled. Causes skin

irritation. Causes serious eye irritation. May cause respiratory irritation. May be fatal if swallowed and enters airways. May cause damage to organs through prolonged or repeated

exposure.

Symptoms/Effects After

Inhalation

Irritation of the respiratory tract and the other mucous

membranes. Inhalation is likely to cause adverse health effects including but not limited to: irritation, difficulty breathing, and

unconsciousness.

Symptoms/Effects After Skin

Contact

Redness, pain, swelling, itching, burning, dryness, and dermatitis. This material is harmful through skin contact, and can cause adverse health effects or death in significant amounts. This material may be absorbed through the skin and

eyes.

Symptoms/Effects After Eye

Contact

Contact causes severe irritation with redness and swelling of the

conjunctiva.

Symptoms/Effects After

Ingestion

Aspiration into the lungs can occur during ingestion or vomiting

and may cause lung injury.

Chronic Symptoms May cause damage to organs through prolonged or repeated

exposure.

4.3. Indication of Any Immediate Medical Attention and Special Treatment Needed

If exposed or concerned, get medical advice and attention. If medical advice is needed, have product container or label at hand.

SECTION 5: Firefighting Measures

5.1. Extinguishing Media

Suitable Extinguishing Media Dry chemical powder, alcohol-resistant foam, carbon dioxide

(CO₂). Water may be ineffective but water should be used to

keep fire-exposed container cool.

Unsuitable Extinguishing Media Do not use a heavy water stream. A heavy water stream may

spread burning liquid.

5.2. Special Hazards Arising From the Substance or Mixture

Fire Hazard Flammable liquid and vapour.

Explosion Hazard May form flammable or explosive vapour-air mixture.

Reactivity Reacts violently with strong oxidisers. Increased risk of fire or

explosion.

Hazardous Decomposition Products in Case of Fire

Carbon oxides (CO, CO₂). Hydrocarbons. Will decompose above 150 °C (> 300 °F) releasing formaldehyde vapours.

Formaldehyde is a potential carcinogen and can act as a skin and respiratory sensitizer. Formaldehyde can also cause

respiratory and eye irritation.

5.3. Advice for Firefighters

Precautionary Measures Fire Firefighting Instructions

Exercise caution when fighting any chemical fire.

Use water spray or fog for cooling exposed containers. In case of major fire and large quantities: Evacuate area. Fight fire

remotely due to the risk of explosion.

Protection During Firefighting Do not enter fire area without proper protective equipment,

including respiratory protection.

14/12/2020 EN (English) 4/16

SECTION 6: Accidental Release Measures

6.1. Personal Precautions, Protective Equipment and Emergency Procedures

General Measures Do not get in eyes, on skin, or on clothing. Keep away from

heat, hot surfaces, sparks, open flames, and other ignition sources. No smoking. Use special care to avoid static electric

charges. Do not breathe vapor, mist or spray.

6.1.1. For Non-Emergency Personnel

Protective Equipment

Use appropriate personal protective equipment (PPE).

Emergency Procedures

Evacuate unnecessary personnel. Stop leak if safe to do so.

6.1.2. For Emergency Responders

Protective Equipment Equip cleanup crew with proper protection.

Emergency Procedures Upon arrival at the scene, a first responder is expected to

recognize the presence of dangerous goods, protect oneself and the public, secure the area, and call for the assistance of trained personnel as soon as conditions permit. Ventilate area.

Eliminate ignition sources.

6.2. Environmental Precautions

Prevent entry to sewers and public waters.

6.3. Methods and Materials for Containment and Cleaning Up

For Containment Contain any spills with dikes or absorbents to prevent migration

and entry into sewers or streams. As an immediate

precautionary measure, isolate spill or leak area in all directions.

Ventilate area.

Methods For Cleaning Up Clean up spills immediately and dispose of waste safely. Absorb

and/or contain spill with inert material. Do not take up in combustible material such as: saw dust or cellulosic material. Transfer spilled material to a suitable container for disposal. Use only non-sparking tools. Contact competent authorities after a

spill.

6.4. Reference to Other Sections

See Section 8 for exposure controls and personal protection and Section 13 for disposal considerations.

SECTION 7: Handling And Storage

7.1. Precautions for Safe Handling

Additional Hazards When Handle empty containers with care because residual vapours

Processed are flammable.

Precautions for Safe Handling Do not get in eyes, on skin, or on clothing. Avoid breathing

vapors, mist, spray. Take precautionary measures against static discharge. Use only non-sparking tools. Use only outdoors or in a

well-ventilated area. Handle empty containers with care

because they may still present a hazard. Wash hands and other

exposed areas with mild soap and water before eating,

drinking or smoking and when leaving work.

Hygiene Measures Handle in accordance with good industrial hygiene and safety

procedures.

According to Regulation (EC) No. 1907/2006 (REACH) with its amendment Regulation (EU) 2015/830

7.2. Conditions for Safe Storage, Including Any Incompatibilities

Technical Measures Comply with applicable regulations. Take action to prevent

static discharges. Ground and bond container and receiving equipment. Use explosion-proof electrical, ventilating, and

lighting equipment.

Storage Conditions Store in a dry, cool place. Keep/Store away from direct sunlight,

extremely high or low temperatures and incompatible materials. Store locked up/in a secure area. Store in a well-ventilated place. Keep container tightly closed. Keep in

fireproof place.

Incompatible Materials

8.2. Exposure Controls

Appropriate Engineering Emergency eye wash fountains and safety showers should be controls available in the immediate vicinity of any potential exposure.

Ensure adequate ventilation, especially in confined areas.
Ensure all national/local regulations are observed. Gas detectors should be used when flammable gases or vapors may be released. Proper grounding procedures to avoid static electricity should be followed. Use explosion-proof equipment.

Gas detectors should be used when toxic gases may be

released.

Personal Protective Equipment Gloves. Protective clothing. Protective goggles. Insufficient

ventilation: wear respiratory protection.

Materials for Protective Clothing

Chemically resistant materials and fabrics. Wear fire/flame

resistant/retardant clothing.

Hand Protection Wear protective gloves.

Eye Protection Chemical safety goggles.

Skin and Body Protection Wear suitable protective clothing.
Respiratory Protection If exposure limits are exceeded or

If exposure limits are exceeded or irritation is experienced, approved respiratory protection should be worn. In case of inadequate ventilation, oxygen deficient atmosphere, or where exposure levels are not known wear approved respiratory

protection.

Other Information When using, do not eat, drink or smoke.
